

**There is a Real Action for Performance Improvement Delivery (RAPID)
way of
reducing costs and improving business performance**

We are all doing our best at trying to achieve this, however achieving real measurable performance improvement and engagement of staff for ongoing sustainable improvement is the challenge that is so elusive.

**In a financial climate where Organisations are required to deliver
growth and sustainable profitability,
now is the time to take proactive action!**

There is a way to:

- Deliver measurable improved performance within 7 weeks from commencement
- Build critical mass for process and activity improvement
- Engage your people in “learning by doing” using training on the job
- Do this with minimal disruption to daily activity – only 3 hours of improvement activity per week
- Many people trained in Continuous Improvement and how to identify and solve problems and issues
- Provides simple and effective lean tools for people to improve the workplace and the business
- It isn't a major intervention and can be used in all facets of a business
- Internal coaches are trained to continue the continuous improvement activity
- The RAPID approach is typically self funding

The Intellog RAPID method is a proven method of engaging many people in an organisation in learning to make a difference. This is principally achieved by improving the workplace and the business, culminating in the transition to a continuous improvement culture and profitable performance.

If you would like to know more about Intellog RAPID and see how Companies are starting to make real bottom line results happen – please contact us for an obligation free meeting and review of the potential for your business.
